Plenary session: “Public-private partnership in health care: finding a balance of interests”

Providing conditions for the development of PPP in the field of health care, including the expansion of the practice of concluding concessionary agreements, are one of the main directions for improving the interaction of authorities and the private sector in this area. The use of PPP instruments in healthcare is primarily designed to ensure the affordability and quality of medical services, increase the efficiency of budgetary funds spending, attract private investment in the industry infrastructure. Today, the required legal and economic prerequisites have been created to increase the attraction of private capital using PPP mechanisms to the development of the healthcare infrastructure. The successful implementation of PPP infrastructure projects, the interest of business to participate in the implementation of public functions in the health care cause the growth of private investments in the industry. The further development of PPP in health care is inextricably connected with the determination of priority and perspective directions of private sector participation in ensuring the tasks facing the authorities in organizing the provision of medical care to the population.

Moderator:

Tkachenko Maksim Viktorovich, Executive director of the Association “PPP Development Center”

Session participants:
Kraevoi Sergey Aleksandrovich, Deputy Minister of Health of the Russian Federation
Voskresensky Stanislav Sergeevich, Deputy Minister of Economic Development of the Russian Federation
Suchkova Elena Nikolaevna, Deputy Chairman of the Federal Compulsory Medical Insurance Fund (CMIF)
Degtyar Pavel Sergeevich, Deputy Governor of the Ulyanovsk Region
Gridasov Gennady Nikolaevich, Deputy Chairman of the Government of the Samara Region - Minister of Health of the Samara Region
Gorodetsky Vladimir Philippovich, Governor of the Novosibirsk Region
Seleznyov Pavel Leonidovich, Chairman of the Committee of the Chamber of Commerce and Industry of the Russian Federation on public-private partnership, member of the General Council of the All-Russia Public Organization “Business Russia”
Popovich Larisa Dmitrievna, Director of the Institute for Health Economics National Research University Higher School of Economics

11.00-13.00

Plenary session “Measures to stimulate localization and transfer of new technologies for the production of medical instrumentation, equipment, medical devices and supplies”

Moderator:
Vanin Aleksey Andreevich, General Director of MDpro

Session participants:
Tsyb Sergey Anatolyevich, Deputy Minister of Industry and Trade of the Russian Federation, the author of the Federal Target Program “Development of pharmaceutical and medical industry of the Russian Federation for the period until 2020 and further”
Murashko Mikhail Albertovich, head of the Federal Service for Surveillance in Healthcare
Rostech is a leading enterprise at the Russian market of medical equipment, innovative biotechnological and pharmaceutical products.
Chemezov Sergey Viktorovich, General Director of the corporation “Rostech”, chairman of the public organization “Russian Engineering Union”, Member of the bureau of the Supreme Council of the United Russia party
Ruchkina Irina Aleksandrovna, Deputy Director of the Department of Pharmaceutical and Medical Industry Development
Demidov Andrey Nikolaevich, General Director of LLC “TITANMED”
Kolesov Nikolay Aleksandrovich, General Director of JSC “Concern Radio-Electronic”
Pharmaceuticals industry is one of the priorities for the modernization of Russian economy. A strategically important task is to increase the share of domestic drugs and reduce overseas ones, the country's transition to the production of its own high-quality and affordable medicines. Import substitution is carried out on the basis of the federal target program for the development of the pharmaceutical and medical industry until 2020. To achieve these goals, in particular it is necessary to make a contact with the largest representatives of the world pharmaceutical industry - to obtain innovative experience and to get acquainted with modern technologies.

Representatives of foreign pharmaceutical corporations see a high potential for the development of the Russian pharmaceutical market, the prospects for expanding the territories of products distribution in the regions and the construction of pharmaceutical enterprises in the Russian Federation.

Moderator:

Session participants:

Alyokhin Aleksey Viktorovich, Director of the Department of Pharmaceutical and Medical Industry Development

To date the medical insurance industry is undergoing innovative changes: the range of insurance products is expanding, the Internet and telecommunication technologies are used in their promotion.

In modern conditions, a fundamentally new approach to the organization of health care is required, guaranteeing the right of every citizen to get medical care that corresponds to the level of development of both the country as a whole and its individual regions. The system of insurance medicine can provide the implementation of this approach.

As the world’s experience shows, the transition to insurance medicine is necessary in the conditions of market economy and development of the market of medical services that provide assurance and accessibility, high quality of medical services for the wide sections of the population, and also helps to solve the problem of attracting additional financial resources to the health care.

Moderator:

Kuznetsov Dmitriy Yurievich, Vice-President of the All-Russian Union of Insurers (ARIA)

Session participants:

**Stadchenko Natalya Nikolaevna**, chairman of the Federal Compulsory Medical Insurance Fund

The need to create conditions for providing quality care to patients within the medical tourism. Medical concierge service. Rating of doctors and clinics.

Moderator:

Session participants:

**Instruments for state support of private investments in innovative projects in the field of medicine** (presentations of start-ups (participants of the Skolkovo Foundation) with examples of projects with public-private support)

**Kaem Kirill Vladimirovich**, Acting Senior Vice President for Innovations, Skolkovo Foundation

**Povalko Aleksandr Borisovich**, General Director, Chairman of the Management Board of JSC RVC

**Yugay Mikhail Torichellievich**, Director General of the International Medical Cluster Foundation

**Round table “Telemedicine, Internet technologies, IT in medicine, E-Health-projects, new opportunities for clinics and patients”**

**Russian health care system is undergoing significant changes. They are associated with the rapid development of telemedicine systems and their infrastructure.**

**Medicine is gaining virtual space. Remote medical consultations, interactive sessions in the formats “physician-physician” or “physician-patient” are becoming more accessible day by day.**

**At the end of July 2017, it was signed a telemedicine law providing for the electronic prescriptions and the possibility of providing remote medical assistance. According to this law, physicians will be able to assist with the use of modern technologies by conducting remote consultations and concilia, monitoring the patient's health, including in online mode.**

**Currently creation of telemedicine systems (and networks) is an integral element of the general direction of health care informatization. Economists and analysts forecast a steady increase in investment in the new industry.**

**Moderators:**

**Lebedev Georgy Stanislavovich**, Head of the Department of Information and Internet Technologies of the I.M. Sechenov First Moscow State Medical University, Doctor of Engineering Science

**Round table “Promising directions in the market of private medical services. Examples of successful investment projects”**

*Due to changes in the medical industry and the needs of modern society, there appeared a need for a systematic modernization of medical equipment in clinics, the introduction of innovative technologies and products in diagnostic and therapeutic practice of all medical institutions in the Russian Federation.*

*Russia successfully applies technologies that allow not only transplantation, but also the engraftment of limbs, tissue restoration at the cellular level, cellular restoration of lungs and bronchi, and an artificial blood substitute has been created. It also became possible to treat many diseases that were previously fatal or could cause non-recoverable harm to the human body. At present, active work is being done to create robots capable of performing more complicated medical operations more accurately than a human surgeon.*

*Time demands higher standards of licensing clinics and the level of staff training. This session is devoted to an example of successful investment projects in the market of medical services.*

**Moderator:**

**Session participants:**

**Smyslov Nikolay Venyaminovich**, General Director of the group of companies “SM-Clinic”

**Kurtser Mark Arkadyevich**, General Director, Member of the Board of Directors of the GC “Mother and Child”, Academician of the Russian Academy of Sciences, holder of Habilitation degree in Medicine, Professor
